EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

ABSTRACT

A terminal connection (1) is provided that includes a threaded sleeve (2) and a counter sleeve (3) that can be connected to it, and a terminal insert that can be pressed against an elongated body (4). The connection has a coupling element (6) that can be detachably connected to the connection and includes a depression (7) and a passage (8) for the elongated body (4), and a radially protruding collar located on the threaded sleeve (2) fits and can be inserted into the depression (7). The coupling element (6) has radially inwardly directed projections (9) for engaging over the collar of the threaded sleeve (2) in the coupling position that are located on a front edge of the depression in the insertion direction of the threaded sleeve (2). The coupling element (6) has a fixing area (10) adjacent to the depression (7) for connecting to a counterpart or a retaining nut and/or through opening (11) of a housing (12), to which the terminal connection (1) is to be attached. This enables the elongated body to be connected in a fixed manner to a counterpart or housing prior to its fixation and to be subsequently mounted.
